Two CD-ROM Set

Here is an incredible collection of Air Force photographs, presented in our unique IMAGE GALLERY concept. This Adobe Acrobat format reproduces the photos in a computerized photo album suitable for quick full-screen browsing. It was designed to mimic the look and feel of a real book; there is no need to laboriously import specific images into a slow-loading program for viewing and printing. As you flip through the images in the Gallery, you can magnify photographs for better viewing. Every conceivable flying vehicle in the Air Force fleet is depicted, along with excellent real-life views of the men and women of the USAF at work defending our country and our freedom. From the B-2 Stealth bomber to the C-130 transport, thousands of pictures from 1995 through the present war against terrorism show every facet of the USAF. Categories include airplanes, bombers, fighters, helicopters, spacecraft, rockets, special duty, tankers, trainers, transports, people, and operations. Our CD-ROMs are designed to provide a convenient user-friendly reference work, utilizing the benefits of the Adobe Acrobat PDF format to uniformly present thousands of pages that can be rapidly reviewed or printed. Vast archives of important government information that might otherwise remain inaccessible are available for instant review. The documents are reproduced using Adobe Acrobat PDF software - allowing direct viewing on Windows and Apple Macintosh systems. Reader software is included on the CD. This CD-ROM makes an ideal reference work and educational tool, and is indispensable for any military or aviation enthusiast, researcher, student, or historian! A companion set of four CD-ROM discs, available here at amazon.com as ISBN 1931828938, contains these images and many more (over 10,000 images in all) in the computer-friendly JPG format.
