

Flight Tests

This is a small book. It takes each exercise of the flight test and tells you exactly what to do, what to say, and what to look out for. You will get the testing officer on your side - even before you leave the ground. Do what the book says and YOU WILL PASS your flight test - first time. The Author has been training and testing pilots for more than 40 years So he knows precisely what the testing officer is looking for in each exercise. It feels great to go for your test with no butterflies, because you are confident of passing easily. Covers tests by SACAA; JAA and CASA.
