

ISO 14951-11:1999, Space systems -- Fluid characteristics -- Part 11: Ammonia

This part of ISO 14951 specifies limits for the composition of ammonia (NH₃) intended as a coolant and used in the servicing of space systems, and test methods for verification of its composition. This part of ISO 14951 is applicable to ammonia used in both flight hardware and ground servicing, systems, and equipment. It is applicable to influents only to the extent specified herein. This title may contain less than 24 pages of technical content.
