

Travels in Hyper Reality

Travels in Hyper Reality is a collection of essays written in various times and contexts by Umberto Eco, a self-defined semiologist. Semiotics is the study of the language of signs and how they are formed through language, communication, and organization. Eco takes the reader through various explorations of the different forms that these signs may take in day to day life, including behaviors, politics, artificial landscapes, and words. Eco suggests that freedom of thought arises through understanding the signs that are being employed through various agencies.
